

ROCKY RIVER STREAM STABILIZATION AND SEWER PROTECTION IN NORTH ROYALTON

North Royalton, OH

ROCKY RIVER · SMALL TRIBS TO ROCKY RIVER EAST BRANCH

Summary

This segment of Rocky River was historically straightened to accommodate commercial properties along the south side of Rt 82 in North Royalton. Most of the stream channel in this location has been lined with concrete rubble to prevent erosion. Subsequent stream adjustments have resulted in exposing a 30 inch sewer main in two locations, and one sewer lateral. The stream will likely be reconstructed in this area to raise the bed above the exposed sewers as well as realigned away from the sewer alignment where feasible. The construction work will improve stream geomorphology and habitat in Rocky River.

Project Details

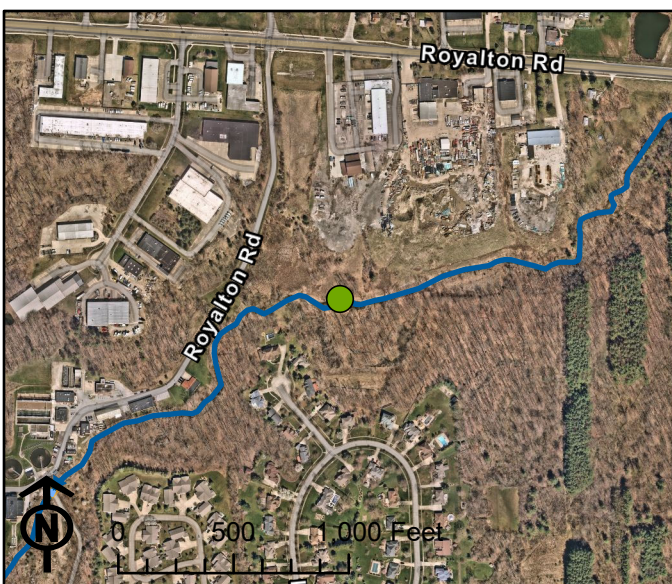

Asset ID(s): RY00385

Contract Type: Design/Bid/Build

Construction Cost: \$711,535.00

Completed Date: June 1, 2022

Watershed Team Leader: Nicole Velez (velezn@neorsd.org)
