

## Gott Fen Expansion

Streetsboro, OH

### Project Details

**Status:** Complete  
**Watershed:** Cuyahoga River  
**Implementer:** City of Streetsboro

**Funding Year:** 2010  
**Award Amount:** \$600,000  
**Tier:** 2

### Summary:

The Gott Fen Expansion Project permanently protects critical and rare water resources including a Boreal Fen Community within the headwaters of the Tinker's Creek watershed of the Cuyahoga River basin. The 55-acre property contains over 50 acres of high-quality Category 3 wetland habitat classified as a Boreal Fen. The property also contains ~2,880 linear feet of the Tinker's Creek mainstem, which borders the adjacent 50-acre Gott Fen State Nature Preserve. The incorporation of this tract into the Preserve will ensure that the entirety of the Tinker's Creek floodplain in this area, including the Fen community on both banks of Tinker's Creek is protected in perpetuity.
